

10mL MULTI-DOSE VIAL **BOLDENONE UNDECYLENATE**

Concentration	200mg/ml
Route of A.	Intramuscular
Schedule	CIII – Rx Only
Form	Injectable

Boldenone Undecylenate is a long-acting ester of boldenone, a synthetic anabolic-androgenic steroid structurally related to testosterone. When formulated as an intramuscular depot injection, the undecylenate ester supports gradual release of the active compound from the injection site and prolonged systemic availability.

Following ester cleavage, boldenone interacts with androgen receptors and may influence androgen-responsive processes, including protein metabolism and nitrogen retention. The nature and intensity of its pharmacological effects may vary according to the administered amount, duration of exposure, individual sensitivity, and underlying physiological condition.

Boldenone Undecylenate has primarily been associated with veterinary medicine, while its authorization and permitted uses vary between jurisdictions. It should not be presented as an approved human treatment unless supported by the applicable national product licence and prescribing information.

KEEP OUT OF REACH OF CHILDREN
STORE INJECTION IN A COOL,
DRY PLACE BETWEEN 15–25°C (59–77°F)

PROTECT INJECTION FROM LIGHT AND
MOISTURE USE TABLET ONLY AS DIRECTED
BY A HEALTHCARE PROFESSIONAL
